

AUTOPROMOTEC 2009 grows:

"Fuelling, New Energies, New Motorizations for a Sustainable Mobility"

More than ever Autopromotec anticipates the strategic trends of the transport industry

More than 97% of energy used for road transportation comes today from petroleum sector. Considering the international growing fuel demand, due to fast fluctuations in oil costs, because of the strong demand for gas emissions reduction and beside the necessity to comply with the worldwide environmental protection regulations, new alternative energies are coming quickly on the international market.

What about future energy solutions? Which servicing will have to be provided to users of new technologies? Which qualification level will be expected by auto repair specialists?

Autopromotec 2009 is the right place to present the latest new technologies, sharp researches and technical solutions for vehicle fuelling, new alternative energies, new motorizations and follow-up for a sustainable mobility.

EXHIBITION – TECHNICAL CONFERENCES – TEST TRACKS

In cooperation with CONSORZIO ECOGAS Network and the teaching world, these new fields will show and confer with the major international experts at Bologna Fiere fairgrounds.

A particular communication will be held internationally.

A MORE AND MORE SPECIALISED EXHIBITION

EXHIBITORS FOR THE SECTOR OF FUELLING, NEW ENERGIES, NEW MOTORIZATIONS FOR A SUSTAINABLE MOBILITY

- ❑ Car manufacturers' aftermarket, hybrid vehicles and connected servicing networks and suppliers
- ❑ Engines research centers, technical centers and Universities
- ❑ Fuel cells suppliers
- ❑ Manufacturers of power and secondary batteries
- ❑ Building technologies and services for filling stations providing both traditional and alternative fuels
- ❑ Suppliers, services, specialists and installers for alternatives energies used for vehicle fuelling: gas, electricity, biofuel, biodiesel, bioethanol, hydrogen, LPG, CNG
- ❑ Equipment and products for installing and servicing LPG and/or CNG systems
- ❑ Official bodies and environmental associations
- ❑ Specialized and technical Press

A TECHNICAL CONFERENCES PROGRAM

"Which energy for tomorrow?"

Round tables, new energies and technical communication, "green" trends conferences and business opportunities will be offered to the international audience, experts and institutions.

A DYNAMIC EVENT WITH TEST DRIVE

A showcase of green vehicles equipped with new motorizations will be displayed in the core of Autopromotec Exhibition.

Manufacturers will show their expertise to special installers. Professionals will have the opportunity to test new "green" systems and vehicles.
